Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/571,725	Applicant(s) HARMER ET AL.	
	Examiner /Steven O. Douglas/	Art Unit 3771	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I. (claims 1-22) in the reply filed on 9/14/09 is acknowledged.

Specification

The disclosure is objected to because of the following informalities: the Specification is lack a brief description of FIG. 8AA.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 6 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 6, clear and proper antecedent basis for the "curved wall" (line 2) should be defined.

In regard to claim 8, clear and proper antecedent basis for said "plenum chamber" (line 1) should be defined.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3771

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4-10,15,16 and 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Ingle et al. (US 6,679,256).

The Ingle et al. reference discloses a dry powder inhaler (see Figs. 3 and 6) comprising a medicament pack 104 with a lid 106, a drug outlet tube 116 with a primary piercing element 118, a secondary piercing members (i.e. see teeth or vanes) 114 and a supply of a charge gas 122.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ingle et al. in view of Braithwaite (US 2005/0121023).

The Ingle et al. reference discloses a dry powder inhaler (supra), but fails to disclose the inhaler as including a circular nozzle with a substantially tangential inlet port as claimed. The Braithwaite reference discloses another dry powder inhaler having a circular nozzle 8 with a tangential inlet port (proximate reference numeral 16 in Fig. 1). It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute an inhaler (i.e. with a circular nozzle 8 with a tangential inlet port) as, for example, shown by Braithwaite for

Art Unit: 3771

the inhaler of Ingle et al. wherein so doing would amount to the substitution of one type of inhaler for another.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Schuler et al. reference pertains to a system for opening a powder receptacle having a plurality of teeth or vanes.

Claims 11-14,17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
